

LASER RIFLE

HEAVY WEAPON

The Laser Rifle is a larger, more powerful version of the standard Stun Gun. It has better range and more ammunition.

Like the smaller version, it can be set to either Stun or Kill modes.

Laser rifles are usually assigned by Security division, Off-world teams are usually issued one when traveling to unknown worlds. Most Peregrine spacecraft have at least one Laser Rifle in their ship's locker.

The Laser Rifle is powered by a large battery cell that can be recharged at Moonbase Omega's main power supply.

Peregrines do not put out enough power to recharge a Laser Rifle.

Laser Rifle
